foundation course in mathematics for jee neet olympiad class 10 with case study approach is the

thoroughly revised and updated 5th edition 2 colour of the comprehensive book for class 10 students who aspire to become doctors engineers the book is focused at 3 goals â bring concept clarity sharpen problem solving build a strong foundation the book discusses theoretical concepts in detail accompanied by illustrations learn more let s do activity did you know time to check your knowledge another unique feature of this book is the case study approach where most critical problem solving concepts are discussed in various permutations and combinations so as improve problem solving skills among the students the theory is followed by the exercise part which covers in total 1800 questions divided into 4 levels of fully solved exercises which are graded as per their level of difficulty exercise 1 master boards mcqs fib true false assertionâ reason passage matching very short short long answer type questions including past years board qns this exercise also includes â reasoning based hots and case based mcqs exercise 2 master the ncert all textbook exemplar questions exercise 3 foundation builder question bank on ncert chapter including mcqs 1 correct mcqs 1 correct passage assertion reason multiple matching and numeric integer type questions with past years â ntse jstse kvpy neet jee main considering syllabus and level of difficulty exercise 4 foundation builder question bank on connecting topics chapters including mcqs 1 correct mcqs 1 correct passage assertion reason multiple matching and numeric integer type questions with past years â ntse jstse kvpy neet jee main considering syllabus and level of difficulty the book adheres to the latest syllabus set by the ncert going beyond by incorporating those topics which will assist the students to scale up in the next classes to achieve their academic dreams of medicine or engineering

this book constitutes the refereed proceedings of the 21st international conference on business process management bpm 2023 which took place in utrecht the netherlands in september 2023 the 27 papers included in this book were carefully reviewed and selected from 151 submissions they were organized in three main research tracks foundations engineering and management

as internet traffic grows and demands for quality of service become stringent researchers and engineers can turn to this go to guide for tested and proven solutions this text presents the latest developments in high performance switches and routers coupled with step by step design guidance and more than 550 figures and examples to enable readers to grasp all the theories and algorithms used for design and implementation

network algorithmics an interdisciplinary approach to designing fast networked devices second edition takes an interdisciplinary approach to applying principles for efficient implementation of network devices offering solutions to the problem of network implementation bottlenecks in designing a network device there are dozens of decisions that affect the speed with which it will perform sometimes for better but sometimes for worse the book provides a complete and coherent methodology for maximizing speed while meeting network design goals the book is uniquely focused on the seamless integration of data structures algorithms operating systems and hardware

software co designs for high performance routers switches and network end systems thoroughly updated based on courses taught by the authors over the past decade the book lays out the bottlenecks most often encountered at four disparate levels of implementation protocol os hardware and architecture it then develops fifteen principles key to breaking these bottlenecks systematically applying them to bottlenecks found in end nodes interconnect devices and specialty functions located along the network later sections discuss the inherent challenges of modern cloud computing and data center networking offers techniques that address common bottlenecks of interconnect devices including routers bridges gateways endnodes and servers presents many practical algorithmic concepts that students and readers can work with immediately revised and updated throughout to discuss the latest developments from authors courses including measurement algorithmics randomization regular expression matching and software defined networking includes a new rich set of homework exercises and exam questions to facilitate classroom use
